

1. UX Document

1.1. Responsive Design

Every page has a responsive design, which puts the creation of Tours or Tour Logs first and then shows the entries of that page. Additionally, the nav bar is minimized on the right.

1.2. Visual Elements

The starting page contains the following elements.

The Form for adding new Tours, where the ID and later on the distance, route information and time is automatically calculated and filled

The currently existing Tours are shown. If there are no Tours, its empty

Create Tour

Select transport type ▼

Add Tour

Tour List

If there are Tours, it is shown like in the following image.

Create Tour

Name

From

To

Description

Transport Type

Add Tour

Tour List

Mount Everest
Wien → Everest City
Chillige Feierabendrunde

Walking

[View Details](#) [Edit](#) [Delete](#)

With “View Details” the user is routed to the details page for that Tour. “Edit” opens up an inline editing feature. And “Delete” deletes.

While “Editing” other Tours are still visible. Even if new Tours are added “passively” (pull-prinzip), the “Editing” feature stays.

Add Tour

If the User does not add every required field. He will be notified and the “Add Tour” button is disabled.

Under `/tours/{TOUR ID}` the detail of a tour is shown with a placeholder image of the Route. With “View Logs” the user can see all the Tour Logs of that Tour.

Route Information:

[View Logs](#)

Currently for Tour 0, there are no Logs, so its empty. After adding

The screenshot shows a web browser at localhost:4200/tours/0/logs. The page has a dark header with 'Tour Planner' and 'Tours' links. The main content is divided into two sections. On the left is the 'Add Tour Log' form, which includes fields for Date (05.04.2026), User Name (placeholder: Enter username), Distance (km) (0), Total Time (minutes) (0), Rating (1-5) (0), Difficulty (1-5) (0), and a Comment field. A blue 'Save Log' button is at the bottom. On the right is the 'Tour Logs' section, which displays a light blue message box stating 'No logs found for this tour.'

This screenshot shows the 'Add Tour Log' form with validation errors. The 'User Name' field has a red border and an error icon, with the message 'Username is required.' below it. The 'Rating (1-5)' field contains the value '1'. The 'Difficulty (1-5)' field has a red border and an error icon, with the message 'Difficulty must be between 1 and 5.' below it. The 'Save Log' button is still visible at the bottom.

Possible invalid outputs are handled in Tour Logs as well.

Tours Logs shown like and works very similar to the Tours.

Comment: Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
